

EntreAssess featured in University Industry Innovation Network magazine

We're excited to say that an article about our resources and tools for educators is featured in the current issue of the University Industry Innovation Network magazine! The magazine is handed out to over 450 university leaders, practitioners, CEOs, policymakers and academics at the University Industry Interaction Conference (this year it took place between 20 and 22 June in London) and has a special focus on entrepreneurship education. UIIN members also receive a copy.

The online edition of the 2018 Issue 2 magazine can be accessed [here](#). We're on page 22!
